DESIGN REVIEW COMMITTEE MEETING

Date: April 25, 2003

Meeting No. 45

ATTENDEES: Pamela Burton
Edward Collins
Marc Fisher
Colin Gardner
Elvin Hatch
Alexis Krieg
Joel Michaelesen
Barton Phelps
Buzz Yudell

ABSENT: Sarah Fenstemaker
Judith Green
Bob Haller
Carol Pasternack
Ric Williams

OTHERS PRESENT
Ray Aronson
Bill Ashby
Michael Bade
Ed Blaschke
Frank Castanha
Anthony Cheetham
Julie Cunningham
Wayne Ferren
Sue Hawkins
Scott Johnson
Eric Kleiner
Neil Kritzinger
Ilze Landfried
Martie Levy
Tana Lucido
Melba Ortiz
Ron Saxton
Tye Simpson
Julie Sears
Ron Strahl
Bob Sundberg
Dennis Whelan
Alan Walker
Croft Yjader

ITEM DESCRIPTION

1. Design Approval: Addition to Provost’s Office, College of Creative Studies
   - The entire Creative Studies Building will be repainted. Bright accent colors will be added.
   - Materials used for the addition will match the existing.
   - There will be a corner window, possibly a mitered glass corner rather than a corner post.
   - Area around the building will be landscaped with low plantings. There will be few interesting specimen plants (placed outside the footprint area of a possible future building). A Leptospermum that is coming out elsewhere on campus may be moved to the site.

   ACTION: The addition was unanimously approved.

2. Design Approval: Arbor Entrance Canopy and Rooftop
   - The entrance canopy will have a curved shape and slope back onto the roof. It will project out as far from the building wall as is possible without visible posts or columns.
• It will be a narrow, flat plate structure with radiating arms that recede back to an unknown point on the roof.
• It will look like a large floating translucent plane and have a garden-like feel.
• The small wall trellis will match the canopy in its detailing so that it is translucent and the structural elements are visible.
• A mechanism for washing the canopy and roof will be part of the project.

ACTION: The concept design was approved. The project does not need to return to DRC; the architect will consult with Marc Fisher on design details.

3. Approval: Parking Pay Stations
• The number of stations will be reduced
• The graphics of the panel will be reviewed, simplified and made more elegant. It should be considered in the context of a campus signage program.
• The pole design will be more slender, possibly a tapered round tube metal pole, anodized bronze color. Solar panels will angle upward.
• The machine will be placed as low on the pole as possible to still be ADA compliant.
• Pay stations shall be placed in safe locations; exact locations to be determined in the field. Initial placement will be at entrances the parking lots.
• Emergency phones and blue light shall be included in shop drawings for each station; placement of phones to be determined in the field.

ACTION: The pay stations were approved.

4. Update: Campus Plan
• Marc Fisher said there have been two sets of meetings so far, one for fact finding and then a design workshop. Presentation will be made on May 6 and 7.
• After viewing the UDA presentation, many members expressed their satisfaction with the progress UDA has made and admiration for the organization and consistency they are bringing to the campus plan.

5. Presdesign Consultation: Extended Learning and Campus Parking Structure 3
• The designers addressed programming and massing. They have settled on a large 3 bay structure with 5 levels on the east and 6 levels on the west. They are still discussing where the elevators should be.
• The DRC prefers the ramp on the south edge of the parking structure rather than the middle.
• It was suggested that the entrance to ESL be brought out so that it can be seen when approaching from the west.
• If ELB is only a two-story structure, the site might be considered underbuilt therefore the designers will determine the size and the cost for a third floor shell space prior to presentation to CPC.

ACTION: The project was approved for site and massing.
6. **Update: Regents Design Reviews**

- Marc Fisher explained that the Regents approved the Student Resource Building.
- Regent Hopkinson did not like Snidecor and the campus will work with her to develop a design that can go back to them next month. DRC will see where the design is next month also.

7. The group watched the East Gate Virtual Reality Model.
