DESIGN REVIEW COMMITTEE MEETING

Date: October 24, 2003

Meeting No. 46

ITEM DESCRIPTION

1. Design Approval: Alumni House
   - Architect, Barry Berkus, is to study entrance stairs for incorporating seating and intermediate landings and for reducing size of stair wall and making stairs less steep.
   - Exterior materials and colors might mirror the Engineering Science Building. Use of local sandstone and tone-on-tone colors were suggested.
   - Suggestion that the project should strive for a more civic, less residential feel.
   - Committee likes the nautical references of the design.
   - Building should be approachable.
   - There was widespread support for a projection wall.
   - Landscape will be developed at a later date.
   - Marc Fisher will try to find 5 parking spaces offsite so that the site spaces can be developed as landscape.
   - The project design is approved.

2. Review of By-Laws and Guidelines
   - In progress.

3. Ground Breaking at California Nanosystems Institute
   - The meeting was adjourned to allow members to attend this special event.

Meeting notes by others, minutes prepared by

Ilze Landfried
